

2005 - 2006 Equipment Rental Rates Division of Equipment

Background

Section 140 of the California Streets and Highway (S&H) Code allows the California Department of Transportation (Caltrans) to establish and maintain shops for the construction, repair and service of its mobile equipment. The Division of Equipment (DOE) owns and operates over 13,000 pieces of equipment within its rental services, which are either rented out (active fleet) to customers or utilized by DOE for providing its rental services. The ever-changing dynamics of the fleet is a result of constant additions (new purchases, fabrications and newly built equipment) and depletions (surplus sales and equipment accidents or failures) that occur throughout the year.

S&H Section 140.3 established an internal service fund, the Equipment Service Fund (ESF), in the State Treasury to account for the operations of the DOT's mobile equipment program administered by DOE. DOE is authorized by this statute to operate an equipment rental business through cost recovery rental rates for its mobile equipment fleet. This process must ensure that the rates recover the current fiscal year costs while also maintaining a 60-day working capital. If rental rate revenues exceed the incurred costs, DOE will be in an excess retained earning situation, in which the excess must be refunded to the customers.

Accounting and System Background

The Division of Accounting, a separate entity within Caltrans, provides the financial accounting services to DOE. The expenditure data is collected and recorded by DofA through utilization of the Rental Rate System (RRS) and the Transportation Accounting and Management System (TRAMS). These systems track and report DOE incurred costs. The RRS tracks the individual costs incurred by a specific piece of equipment or in a specific maintenance class. TRAMS tracks the cumulative cost data of the expenditures paid by DOE.

DOE uses the Fleet Anywhere (FA) system as a fleet management and fleet tracking database, which tracks all vehicles owned and operated by DOE and records all purchases, improvements, repairs and operating costs for each vehicle by maintenance class. FA also captures commercial repair cost data. The FA data is directly tied to the Shop Job Order File (SJO file), which is a system database that records all cost data incurred by DOE for operating its fleet. IT data is shared between FA and RRS through the SJO file.

FY 2005-06 Rental Rate Development Overview

The Division of Equipment (DOE) FY 2005-06 Rental Rates were developed to recover the expected fiscal year costs. The FY 2005-06 forecasted costs were based on historical costs, with a Consumer Price Index (CPI) adjustment. The DOE costs include equipment operating costs (repair, depreciation, operating), as well as administration and DOE overhead, fleet insurance, and administrative pro rata costs. The rates were designed to fully fund DOE for FY2005-06, but may be adjusted (mid-year increase or decrease) if forecasted costs differ from actual costs.

Caltrans' Programs receive an annual equipment budget (also known as Category 25 Equipment Services funding) to meet its expected equipment costs for the entire fiscal year. Category 25 funding will pay for equipment rental costs, as well as for all direct costs incurred by the respective Programs, such as fuel, vehicle damages, and home storage permits. Each Program's Category 25 should be sufficient to cover all rental and other costs associated with operating the rental equipment.

In developing rental rates, DOE is continuing to be successful in keeping the costs to our Program customers at a competitive level, while still providing sufficient funds to cover the cost of purchasing, maintaining and repairing the Caltran's equipment fleet.

Division of Equipment PROGRAM FLEET COST SUMMARY SHEET FY 2005-06

	Active	Rental *	DIRE	CT COSTS		All
